EDUCATION

A2SV, Data Structures and Algorithms	2026 — 2028
Jimma University, Software Engineering	2023 — 2028
Evangadi Tech, Full Stack Web Development	Dec 2024 — March 2025

PROJECTS

A2SV AlgoPath

- Built and launched a structured algorithm-learning platform designed to preserve and extend the A2SV learning experience, giving students access to a 43-week curriculum, curated DSA resources, problem-solving practice, progress tracking, and a clear learning roadmap.
- Engineered a modern, responsive web application using Next.js, TypeScript, Tailwind CSS, and Firebase, with a scalable content architecture that organizes learning materials by phases, weeks, topics, and problems while providing an intuitive experience for students to track their consistency and growth.

New Ramadan New Me

- Designed and launched a culturally resonant self-improvement platform for Ramadan, helping users plan Qur'an reading, complete daily micro-challenges, journal reflections, and build peer accountability during the holy month.
- Engineered a full-stack, mobile-responsive application using Next.js (App Router), Supabase (auth, Postgres, realtime), and Tailwind CSS + shadcn/ui, delivering a serene, minimalist UI with deep blues, gold accents, and smooth server-side rendering

Next Year Me

- Designed and launched a culturally resonant reflection platform for Ethiopian New Year, enabling users to write messages to their future selves
- Engineered a modular full-stack architecture using Next.js, Supabase, and Tailwind CSS for rapid development and scalable collaboration

Telegram Signature Bot

- Developed a Telegram bot in TypeScript that generates personalized message signatures to foster identity, reflection, and emotional resonance in everyday chats
- Built with Node.js and Telegram Bot API, featuring real-time message parsing and dynamic signature generation based on user-defined themes

SKILLS

- **Code:** React (components, hooks, routing), JavaScript, Tailwind CSS, HTML/CSS, Node.js, Next.js, MySQL
- **Tools:** GitHub Pages, Netlify, Render, UptimeRobot, VS Code, Webhooks
- **Community & Communication:** collaborative learning facilitation, public development strategies

TECHNOLOGIES & LEARNING

- Exploring Next.js for full-stack capabilities
- Strengthening accessibility principles with Figma prototyping
- Exploring AI/ML

VOLUNTEER EXPERIENCE

- **Google Women Techmakers (WTM) Ethiopia** — Events & Social Media Lead
Coordinated inclusive events and managed digital outreach to amplify visibility and engagement within the local tech community
- **DSA Learning Community** — Founder & Facilitator
Created and led a peer-driven learning community focused on strengthening DSA.
